

New Source Review newspaper advertisements for construction permit applications, March 18, 2004. The following public notices have been published in the newspapers listed below each advertisement. These newspaper advertisements for construction permit applications were published on one of the following dates: March 16, March 17, or March 18, 2004. Public notices are generally published every two weeks. The previous publication of public notices was March 2 – 4, 2004.

### PUBLIC NOTICE

The Tennessee Division of Air Pollution Control (TDAPC) has received requests for construction of air contaminant sources as noted below. The proposed construction is subject to part 1200-3-9-.01(1)(h) of the Tennessee Air Pollution Control Regulations, which requires a public notification and 30-day public comment period. Interested parties may express their comments and concerns in writing to Mr. Barry R. Stephens, Director, Division of Air Pollution Control, 9<sup>th</sup> Floor, L & C Annex, 401 Church Street, Nashville, Tennessee 37243-1531 within thirty (30) days of the date of this notice. Questions concerning a source may be addressed to the assigned Division personnel at the same address or by calling 615-532-0554.

Individuals with disabilities who wish to participate should contact the Tennessee Department of Environment and Conservation to discuss any auxiliary aids or services needed to facilitate such participation. Such contact may be in person, by writing, telephone, or other means, and should be made no less than ten days prior to the end of the public comment period to allow time to provide such aid or services. Contact the Tennessee Department of Environment and Conservation ADA Coordinator, 12th Floor, 401 Church Street, Nashville, TN 37243, 1-866-253-5827. Hearing impaired callers may use the Tennessee Relay Service, 1-(800)-848-0298.

The applicant is Custom Care Cleaners with a mailing address of 616 Condry Lane, Maryville, TN 37803. They seek to obtain an air contaminant permit (Division identification number: 05-0202-01/57155) for a Dry Cleaning Operation located at the same address. This existing operation consists of one (1) dry-to-dry perchloroethylene dry cleaning machine. A refrigerated condenser is used for pollution control. There would be no physical construction. Regulated air contaminants are emitted by this source. Ms. J. Aslinger is the assigned Division person.

For the Blount County "Maryville Daily Times"--published once on or before Thursday, March 18, 2004.

---

The applicant is DTR TN-Tazewell with a mailing address of 199 Pottertown Road, Midway, TN 37809. They seek to obtain air contaminant permits (Division identification numbers: 13-0083-02/57094, 13-0083-03/57095, 13-0083-15/57097, and 13-0083-16/57096) for modification of a Metal Parts Coating Operation located at 150 Hester Lane, Tazewell, TN 37879. This existing operation consists of two (2) primer dip machines, one (1) adhesive spray machine, one (1) finish coat dip machine, and one (1) finish coat spray machine. The process consists of coating metal parts with adhesive, adhering a molded rubber part to the metal, then coating the final product with paint. Steam heated ovens are used to dry the intermediate and final products. The proposed modification is the addition of an oxidation system to control organic vapors, which include volatile organic compounds and hazardous air pollutants. There would be physical construction. Regulated air contaminants would continue to be emitted by this source. Mr. Steven R. Simpson is the assigned Division person.

For the Claiborne County "Claiborne Progress"--published once on or before Thursday, March 18, 2004.

---

The applicant is Nordyne, Inc. with a mailing address of 2800 Hoff Road, Dyersburg, TN 38024. They seek to obtain an air contaminant permit (Division identification number: 23-0123-02/57142) for construction of a Metal Forming Operation at the same address. This proposed operation would consist of fin presses and associated equipment used to form aluminum sheet metal into product. Because of the amount and type of emissions, the use of pollution control equipment is not proposed. There would be physical construction. Regulated air contaminants would be emitted by this source. Mr. J. Fuss is the assigned Division person.

For the Dyer County "State Gazette"--published once on or before Thursday, March 18, 2004.

---

The applicant is Jefferson Smurfit Corp. with a mailing address of 1720 Ninth Avenue, Humboldt, TN 38343-1718. They seek to obtain an air contaminant permit (Division identification number: 27-0092-01/57102) for construction of a Steam Generating Operation at the same address. The proposed operation would consist of a new natural gas fired boiler (with propane fuel standby) and associated equipment used to generate steam for paper corrugating operations. This new boiler would replace the facility's old boiler. Because of the amount and type of emissions, the use of pollution control equipment is not proposed. There would be physical construction. Regulated air contaminants emitted by this source would decrease. Mr. M. Smith is the assigned Division person.

For the Gibson County "Milan Mirror-Exchange"--published once on or before Thursday, March 18, 2004.

---

The applicant is Sure Anchor, LLC dba Pinecrest Cleaners of Greeneville, LLC with a mailing address of 3405 Asheville Highway, Greeneville, TN 37743. They seek to obtain an air contaminant permit (Division identification number: 30-0184-01/57161) for a Dry Cleaning Operation located at 1407 Tusculum Boulevard, Greeneville, TN 37745. This existing operation consists of one (1) dry-to-dry perchloroethylene dry cleaning machine. A refrigerated condenser is used for pollution control. This source was previously permitted at a different location. There would be no physical construction. Regulated air contaminants are emitted by this source. Ms. J. Aslinger is the assigned Division person.

For the Greene County "Greeneville Sun"--published once on or before Thursday, March 18, 2004.

---

The applicant is Construction Services & Paving Co., Inc. with a mailing address of P.O. Box 101, Crump, TN 38327. They seek to obtain an air contaminant permit (Division identification number: 36-0088-01/56843) for a Batch Mix Asphalt Plant located at 3935 Highway 64, Crump, TN 38327. This existing operation consists of a batch mix asphalt plant with a design capacity of 110 tons per hour, aggregate piles, conveyors, asphalt cement storage, and associated equipment used to produce hot mix asphalt. Number 2 fuel oil is used as fuel for this operation. A wet scrubber is used for pollution control. There would be no physical construction. Regulated air contaminants are emitted by this source. Mr. M. Smith is the assigned Division person.

For the Hardin County "Courier"--published once on or before Thursday, March 18, 2004.

---

The applicant is Tennessee Army National Guard with a mailing address of Houston Barracks, CFMO Environmental Section, Sidco Drive, Nashville, TN 37204-1502. They seek to obtain an air contaminant permit (Division identification number: 43-0063-03/57147 and 43-0063-04/57149) to construct an Asphalt Plant at Gorman Quarry on Highway 70 West, Waverly, TN 37185. This proposed operation would consist of a batch mixer, asphalt cement storage, crushed rock stockpiles, and associated equipment used to produce hot mix asphalt (HMA). Two (2) oil-fired/diesel portable power generators would be used to supply power. A

baghouse would be used for pollution control of particulates (TSP). There would be physical construction. Regulated air contaminants would be emitted by this source. Mr. W. Medley is the assigned Division person.

For the Humphreys County "News Democrat"--published once on or before Thursday, March 18, 2004.

---

#### FIRST APPLICANT

The first applicant is Tuscarora Incorporated with a mailing address of P.O. Box 448, 800 Fifth Avenue, New Brighton, PA 15066. They seek to obtain an air contaminant permit (Division identification number: 60-0184-02/57145) for modification of a Foam Products Manufacturing Process located at 1323 North Main Street, Mt. Pleasant, TN 38474. This existing operation consists of pre-expanders, pre-puff storage bags, molding presses, rigid polyurethane molding equipment, and other associated equipment used in the manufacture of foam products. The requested modification is to increase annual allowable VOC emissions from 96 tons to 245 tons. Because of the amount and type of emissions, the use of pollution control equipment is not proposed. There would be no physical construction. Regulated air contaminants emitted by this source would increase. Mr. M. Smith is the assigned Division person.

#### SECOND APPLICANT

The second applicant is Swarco Industries with a mailing address of P.O. Box 89, Columbia, TN 38401. They seek to obtain an air contaminant permit (Division identification number: 60-0088-02/57154) for modification of a Glass Beads Production Operation located at 901 E. James Campbell Blvd., Columbia, TN 38401. This existing operation consists of a natural gas fired furnace and associated equipment used to melt sheet glass cullet into beads. The requested modification is to effectively double production output by installing an additional natural gas fired furnace and associated equipment that are identical to the existing operation. Because of the amount and type of emissions, the use of pollution control equipment is not proposed. There would be physical construction. Regulated air contaminants emitted by this source would increase. Mr. M. Smith is the assigned Division person.

For the Maury County "Daily Herald"--published once on or before Thursday, March 18, 2004.

---

The applicant is Heraeus Metal Processing, Inc. with a mailing address of P.O. Box 280, Coalfield, TN 37719. They seek to obtain air contaminant permits for construction of air contaminant sources at Route 62 E. Knoxville Highway, Wartburg, TN 37887, as follows:

- (1) Roasting Ovens (Division identification number: 65-0049-01/57135). This proposed operation would consist of eight natural gas-fired roasting ovens used to recover precious metals. An afterburner, quench tank, and scrubbers would be used for pollution control. There would be physical construction. Regulated air contaminants would be emitted by this source. Mr. T. Blake is the assigned Division person.
- (2) Pan Dumper (Division identification number: 65-0049-02/57136). This proposed operation would consist of dumping and drum filling equipment. A baghouse would be used for pollution control. There would be physical construction. Regulated air contaminants would be emitted by this source. Mr. T. Blake is the assigned Division person.
- (3) Ball Mill No. 1 (Division identification number: 65-0049-03/57137). This proposed operation would consist of one ball mill and one shaker screen. A baghouse would be used for pollution control. There would be physical construction. Regulated air contaminants would be emitted by this source. Mr. T. Blake is the assigned Division person.

(4) Ball Mills No. 2, 3, and 4 (Division identification number: 65-0049-04/57138). This proposed operation would consist of three ball mills and one shaker screen. A baghouse would be used for pollution control. There would be physical construction. Regulated air contaminants would be emitted by this source. Mr. T. Blake is the assigned Division person.

(5) Rotary Furnace (Division identification number: 65-0049-05/57139). This proposed operation would consist of one natural gas-fired rotary furnace used to recover precious metals. A baghouse would be used for pollution control. There would be physical construction. Regulated air contaminants would be emitted by this source. Mr. T. Blake is the assigned Division person.

(6) Refining Operation (Division identification number: 65-0049-06/57140). This proposed operation would consist of one natural gas-fired reverberatory furnace, one natural gas-fired crucible furnace, and two induction furnaces. A baghouse would be used for pollution control. There would be physical construction. Regulated air contaminants would be emitted by this source. Mr. T. Blake is the assigned Division person.

For the “Morgan County News”--published once on or before Thursday, March 18, 2004.

---

The applicant is VA-Tennessee Valley Healthcare-York Campus with a mailing address of 3400 Lebanon Pike, Murfreesboro, TN 37219. They seek to obtain an air contaminant permit (Division identification number: 75-0023-01/56236) for modification of a Boiler Operation located at the same address. The proposed modification is to increase the allowable amount of standby fuel usage from 80,000 gallons per year to 300,000 gallons per year. There would be no physical construction. Regulated air contaminants are emitted by this source. Mr. R. Simmons is the assigned Division person.

For the Rutherford County “Daily News Journal”--published once on or before Thursday, March 18, 2004.

---

The applicant is Gallatin Oil Company, Inc. with a mailing address of P.O. Box 1076, Gallatin, TN 37066. They seek to obtain an air contaminant permit (Division identification number: 83-0326-01/48812) for a Gasoline Dispensing Facility at Cambridge Market located at 1174 Long Hollow Pike, Gallatin, TN 37066. This existing operation consists of one (1) 10,000 gallon gasoline tank, one (1) 6,000 gallon gasoline tank, and twelve (12) gasoline dispensing nozzles. Stage I vapor recovery equipment is used for gasoline emission control. There would be no physical construction. Regulated air contaminants are emitted by this source. Mr. G. Gatlin is the assigned Division person.

For the Sumner County “News-Examiner”--published once on or before Thursday, March 18, 2004.

---

The applicant is Global Stone Tenn Luttrell Company with a mailing address of 486 Clinch Valley Road, Luttrell, TN 37779-9414. They seek to obtain air contaminant permits for modification of air contaminant sources located at the same address, as follows:

(1) Tertiary Roller Mill Grinding and Drying Operation (Division identification number: 87-0023-05/57098). This existing operation consists of two (2) roller mill feed bins, a roller mill, and associated equipment used to produce pulverized limestone. A baghouse is used for air pollution control. The requested modifications are to replace the screw pump with two surge pots, and to increase the production rate. There would be physical construction. Regulated air contaminants are emitted by this source. Mr. M. Baghernejad is the assigned Division person.

(2) Roller Mill Load Out System (Division identification number: 87-0023-06/57099). This existing operation consists of three storage bins used to load out material to trucks and railcars. A baghouse is used for air pollution control. The requested modification is to add a new storage bin. There would be physical construction. Regulated air contaminants are emitted by this source. Mr. Moe Baghernejad is the assigned Division person.

For the Union County "News Leader"--published once on or before Thursday, March 18, 2004.

---

The applicant is the University of Tennessee at Martin with a mailing address of 105 Moody Avenue, Maintenance Complex, Martin, TN 38238. They seek to obtain an air contaminant permit (Division identification number: 92-0014-04/57113) for construction of an Electric Power Generation Operation at 105 Moody Avenue, Maintenance Complex, Martin, TN 38238. This proposed operation would consist of four (4) diesel engines driving electrical power generators. Because of the amount and type of emissions, the use of pollution control equipment is not proposed. There would be physical construction. Regulated air contaminants would be emitted by this source. Mr. John Patton is the assigned Division person.

For the "Weakley County Press"--published once on or before Thursday, March 18, 2004.
